

SPECIFICATIONS

PRODUCT ID	FBALT
COVERAGE	52/m ² (10mm mortar joint)
DESCRIPTION	FBA L Shape
MASS	3.6 Kg
SIZE	222 mm (length) 140mm 108 mm (width) 76 mm (height)
FINISH	Travertine Smooth
COLOURS	Chai Espresso

Size variation +/- 1.5%

FBA L Shape

Incorporating a brick feature into your design can add a unique element that enhances both the aesthetic and structural aspects of a building.

This addition not only elevates the visual appeal by introducing texture, colour, and pattern variations but also adds depth and character to the overall structure. By strategically using brick as a feature, architects and engineers can create focal points that draw the eye and provide a sense of timelessness and solidity.

It's a versatile choice that complements various design styles, making it a popular option for those looking to achieve a balance between modern elegance and traditional charm.
