**222 X 73 X 16 | 100**  
Length x Height x Thickness  
**10/linear m**  
10mm grout joint

### ADVANTAGES OF CAPE THIN BRICKS

Thin bricks are a versatile and sustainable option for enhancing interior and exterior spaces. At just 16 mm thick, they can be applied directly to existing walls without additional footings, reducing weight and costs while maintaining the classic look of full brick walls.

Fired at over 1120°C for durability and low water absorption, thin bricks are suitable for a wide range of applications. Their uniform size allows for easy installation with minimal cutting, and their natural colour variation suits various settings, such as restaurant interiors and bedroom renovations.

Thin brick returns enable seamless finishing around corners, steps, and edges. Made from locally sourced clay, thin bricks and returns combine aesthetic appeal with practical benefits, making them an ideal choice for any home.
